

QUANTROS

QUALITY

Is your performance data ready for the spotlight?
It will be with **Quantros RRM**

Quantros Regulatory Reporting Management and Performance Improvement (RRM) is a Software-as-a-Service (SaaS) based solution suite that captures, aggregates and analyzes quality and performance data. Quantros RRM™ streamlines the regulatory reporting activities to deliver maximum reimbursement opportunities and power rapid performance improvement.

How high do you want to go?

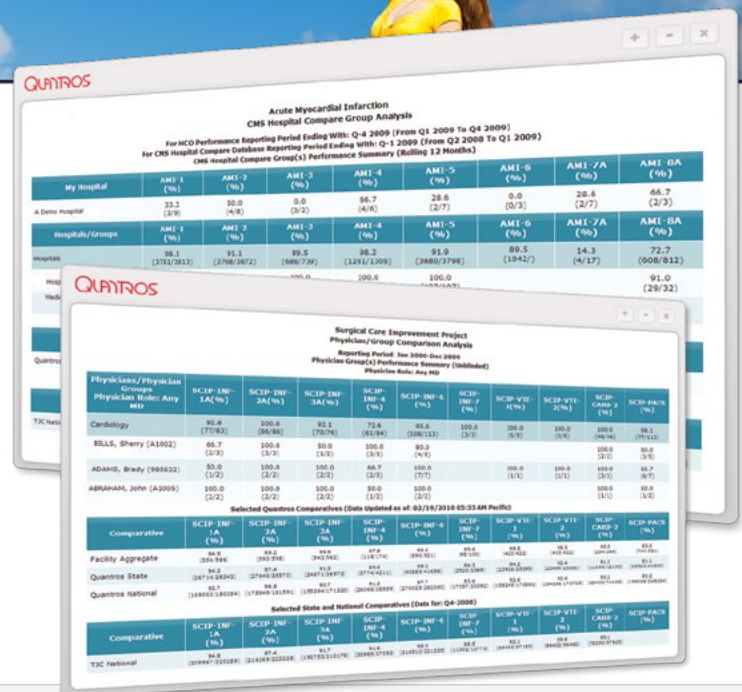

Increase reimbursement and reach your quality goals with the Quantros RRM suite of solutions.

Improving Quality & Reimbursement

Performance improvement demands focus and the data to set the goals that better patient care and increase reimbursement. Quantros RRM gives your organization one solution for your quality reporting and performance improvement initiatives:

- » Comparative reporting
- » Maximize reimbursement
- » Performance excellence
- » Meaningful Use
- » Outpatient and Inpatient Mandatory Module compliance

Features

Quantros RRM offers:

- » Streamlined data collection and reporting
- » Accurate, on-time data submissions
- » Sampling capability for inter-rater reliability (IRR) reporting
- » Comprehensive Core Measures reporting
- » On-demand performance scorecards
- » Comparative analysis tools
- » Collaboration capabilities
- » Embedded links to updated regulatory definitions

Benefits

RRM's Performance Improvement capabilities support:

- » Cross-organization focus and efforts
- » Departmental and system-wide improvement
- » Proactive identification of potential events
- » Improved outcomes
- » Increased transparency
- » Broadened data registry participation
- » Maximized reimbursement
- » Value-based (P4P) purchasing

Achieving Core Measure Performance

The public and the government are watching healthcare performance more closely than ever. Mandated regulatory reporting also puts reimbursement at risk. The Centers for Medicare & Medicaid Services (CMS) now mandates the collection and submission of new outpatient and inpatient measure sets:

Outpatient measure sets:

- » Emergency Department (ED)
- » Immunization (IMM)

Inpatient measure sets:

- » ED Throughput
- » Pain Management
- » Stroke

We've got you covered. Quantros RRM supports Core Measures data collection and submission to The Joint Commission (TJC) and CMS. Quantros supports standard measure sets, such as acute myocardial infarction (AMI) and Heart Failure, as well as optional populations like Hospital Based Inpatient Psychiatric Services (HBIPS).

Demonstrating Meaningful Use

Quantros continuously updates RRM to maintain compliance by adding new measure sets supporting Meaningful Use compliance through all stages.

Quantros has achieved certification for the Meaningful Use quality reporting initiative. They include:

1. Venous Thromboembolism (VTE)
2. Emergency Department (ED)
3. Stroke (STK)

Quantros offers a clear path to long-term Meaningful Use compliance, while supporting data validation, reporting and trending.

Quality reporting is more than Meaningful Use certification. Quantros RRM comparative reporting processes current data and make it available at the facility or physician level. The application supports analysis using a wide variety of criteria, including state, national and TJC cohorts.

**Quantros RRM Clinical Quality Modules are 2011-2012 compliant and have been certified by an ONC-ATCB in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments. RRM-Regulatory Reporting Manager Version 6, Certificate number 06092011-1166-6.*

“ Choosing Quantros for Core Measures and national registry reporting has helped us ensure accurate, on-time submissions and maximize our payor reimbursements. **They're more than a vendor; I consider them a trusted partner for our organization.** ”

*Karin Berntsen, RN, Director,
Quality & Risk Management (former)
Alvarado Hospital, San Diego*
