

QUANTROS SRM

Safety Event Manager

Let your Data Mining Efforts Hit the Mark for Safety Improvement

Create a Safer Care Environment: Reduce Risk Exposure

One adverse event can result in a terrible toll to patient health and safety, trust, and financial and medical resources.

To reach the highest safety goals, preserve revenue, reputation and assets, turn to the Safety Event Manager, part of the Quantros Safety and Risk Management (SRM) solutions family.

Quantros Safety Event Manager provides comprehensive reporting, tracking, monitoring and workflow management of patient safety events.

Your attention can't be everywhere, resources are limited and risks are increasing. Feel safer, and have confidence to manage incidents before they become events with an application that works in the real world of healthcare.

- » **Know:** What happens in real time
- » **React:** Immediate notification, proactive response
- » **Insight:** Learn the root causes for adverse patient, employee and visitor events

“ We've had nothing beyond a stage two ulcer since we installed the Quantros solution. Fines related to pressure ulcers can cost up to \$100,000 in California, so this is a big savings. ”

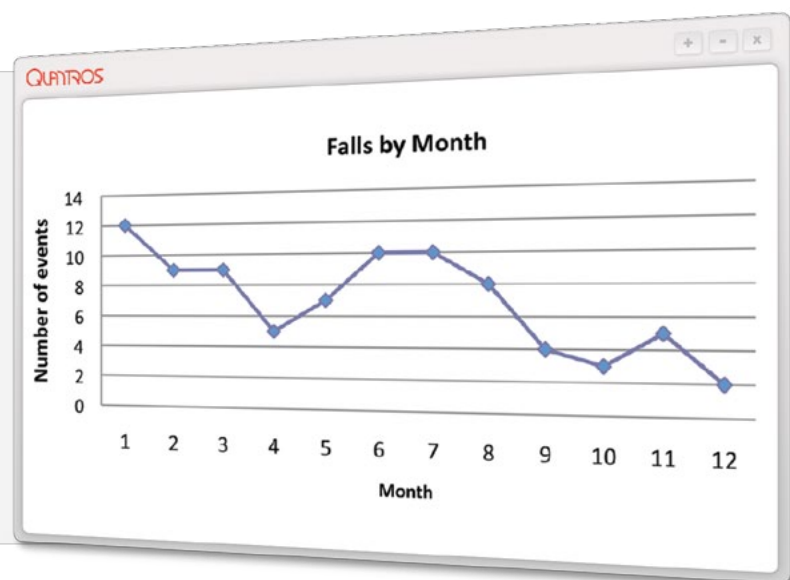

Sandra Trotter, MBA, MPH, CPHQ
Patient Safety Program Director
Lucile Packard Children's Hospital
at Stanford

Reduce:

- » Risk
- » Claims reserve
- » Premiums

Build:

- » A culture of safety and care
- » Revenue
- » Return on investment

QUANTROS SRM

Safety Event Manager

The Backbone of Risk Reduction

Safety Event Manager is a single resource to improve safety, reduce risk and manage preventable events. Like all Quantros applications, its Software-as-a-Service based, reducing implementation and licensing fees. It relieves you of the administrative and information technology burdens while delivering results. Additionally, Safety Event Manager leverages the same interface and taxonomy as other SRM solutions.

It includes the following modules:

- » **Triage Manager:** Offers streamlined data entry to increase compliance with patient safety event reporting
- » **Indicator Scorecard:** Allows acute-care organizations to capture and report rate-based metrics

Safety Event Manager's capabilities include:

- » The ability to alert stakeholders to medical events via email or mobile devices
- » Streamlined workflows to collect event data to support investigation and analysis
- » The ability to evaluate safety performance by department, region, or at the corporate level
- » Support for a single safety event taxonomy
- » Ad hoc reporting
- » Support for an integrated library of standard safety, management and system administration reports
- » External reporting

This powers:

- » Deep understanding into event root causes
- » Streamlined reporting for state and national requirements
- » Reduced risk and improved patient satisfaction
- » Rapid, nimble response
- » The creation of safeguards to prevent or reduce events
- » Consistent reporting and comparison with cohorts
- » Reduced administrative costs
- » Increased collaboration and data sharing
- » Prioritization of key safety initiatives
