

Core Options Website: Transition of Information and Materials to Quantros

In the table below the area of the Core Options website is identified, along with the location where it has been placed in the Quantros infrastructure. There are three Quantros locations:

1. The Quantros website: www.quantros.com for public information
2. The Quantros Support Portal for 'members only' information
3. The Quantros Regulatory Reporting Management application.

In addition, there is information on the Your Focus page- News, Industry Resources and links to external organizations. This can be accessed here: <http://quantros.com/your-focus/quality> .

Each of the locations is displayed following the table.

Core Measures for TJC/CMS

Quantros Regulatory Reporting Management (RRM) solution facilitates the capture, analysis and submission of Core Measures data to The Joint Commission (TJC) and Centers for Medicare and Medicaid Services (CMS). Quantros RRM™ also supports submissions around the National Hospital Quality Measures and CMS Scope of Work Indicators, as well as the HBIPS, Stroke, Emergency Department, VTE and Perinatal Care measures.

Benefits and Values

RRM helps healthcare organizations capture, aggregate, analyze and manage quality and performance data for submission to state and national healthcare quality initiatives. RRM also facilitates the use of this data to identify gaps in care and processes, develop action plans for improvement and justify IPPS reimbursement.

RRM can drive healthcare organizations through performance improvement initiatives, helping enhance productivity through:

- Guaranteed timely data submission
- Reduced administrative burden from clinical upload automation
- Remaining current with regulatory requirements — RRM includes embedded links to updated definitions based on quarterly specifications
- Increasing efficiency with embedded sampling capability
- Increasing accuracy with Inter-rater Reliability (IRR) reporting, via abstractor performance measurement tools
- Automating "Appropriate Care Measure" calculation

RRM facilitates capture and submission of Core Measures data and provides healthcare organizations with transparency around their quality and performance data. Organizations can use it to improve patient care and reduce

Quantros webpage for Core Options Clients

quantros.com/resources-for-core-options

The screenshot shows the Quantros website interface. At the top, there is a navigation bar with the Quantros logo and links for 'Your Focus', 'Our Products', 'Healthcare Issues', 'Company', 'Resources', and 'Support'. Below the navigation bar, the breadcrumb trail reads: 'Home > Quantros Suite of Solutions > Regulatory Reporting Management (RRM) > Resources for Core Options Clients'. The main heading is 'Resources for Core Options Clients'. A blue arrow points from the text 'Client login and access to the RRM application.' to a link in the main content area. Another blue arrow points from the text 'Core Options Helpful Links' to a list of links in the right sidebar. The right sidebar contains sections for 'Regulatory Reporting Management (RRM)', 'Core Options Helpful Links', and 'Additional Resources'.

Client login and access to the RRM application.
